FLUID SEALS (INDIA)[®]
AN ISO 9001 : 2015 CERTIFIED COMPANY

FLUID SEALS INDIA[®] AN ISO 9001 : 2015 CERTIFIED COMPANY incorporated in the year 2012, is India's leading manufacturer of Mechanical Seals & all types of Pump Spares. Our company pioneers in Designing, Manufacturing and Distribution of precision engineered Mechanical Seals and Fluid Sealing Solutions. We have set bench marks on performance, cost and service in our line of products and services offered by us. Our philosophy while attending a seal requirement has been to develop and supply spares for seals giving good performance or develop alternative design to enhance seal performance.

FLUID SEALS INDIA[®] suit standard pumps like, BHEL-WEIR, EBARA, Investa, Indian Dairy, Flowserve, Kishore, Khimline Sulzer, Kirloskar Brothers, Mather Platt, Microfinish, Raje Dia, Roto, Sam Turbo, Stork Johnson, Sulzer, Tushaco & Special Seals have been developed to suit Alfa Laval, Fristam, Pharma Lab, KSB, Grundfos, many mores.

REFURBISHMENT OF MECHANICAL SEALS

FLUID SEALS INDIA[®] have Refurbished, Re-Engineered & Indigenized the following models of multinational brands like JOHNCRANE, AESSEAL, SEALOL, SAFEMATIC, EAGLE BURGMANN, FLOWSERVE, LEAK- PROOF, CHESTERTON etc.

The company is being proficiently managed by the Managing Director, Mr. Majid Loriya. Owing to advanced manufacturing unit spread in an area of 2,240 square feet, we manufacture these seals as per the exact specifications and requirements of our clients, in an efficient manner.

These seals are widely demanded in various industries such as

INDUSTRIES

- | | |
|---------------------------|----------------------|
| ✦ Petrochemical | ✦ Paper & Pulp |
| ✦ Fertilizers | ✦ Oil & Gas Refinery |
| ✦ Sewage Treatment Plants | ✦ Textiles |
| ✦ Biotech | ✦ Power Generation |

| ✦ Chemical | ✦ Others |

INFRASTRUCTURE

Our state-of-the-art infrastructure is backed with the technologically advanced tools and machineries that have facilitated us in the manufacturing of flawless range of industrial products. The manufacturing unit is also equipped Lathe Machines, Drilling Machines, Shaping Machines, Milling and Lapping Machines etc. that facilitate smooth and faster production of industrial products.

SPRAY TECH SYSTEMS

Spray Drying Solutions For R & D and Production

STS 010 - 10 Kg //Hr WE
Nozzle & Rotary Atomiser Spray Dryer

Spray Dryer
Fully Automatic
HMI - Touch Screen
& PLC Based

Technical Specification >

- * Evaporation capacity : 10 ltr/hr.
- * Feed Rate : 14ltr/hr.
- * Output Product Rate
@ 30 - 40 % solid : 4.2 kg/hr.
- * Max inlet temperature : 260 degree C :
accuracy + 1 degree C.
- * atomization : Two Fluid Nozzle ,
Pressure Nozzle & Rotary Atomizer.
- * Application : Food , Pharmaceutical ,
Enzymes, Chemical, Clays, Dyestuff,
Leather, Pigment, Polymer ?& Textile.

Features :

- * SS 316L Construction.
- * Robust High Purity Design.
- * GMP Standards.
- * Sanitary Design.
- * Interchangeable Atomization between -
Rotary atomizer - Pressure Nozzle -
Two fluid nozzle Two in one Design.

Spray Dryer Fully Automatic HMI - Touch Screen & PLC Based

SPRAY TECH SYSTEMS

Spray Drying Solutions For R & D and Production

STS 001 - 1 Kg /Hr WE
Mini Laboratory Spray Dryer

Technical Specifications >

- * Evaporation capacity : 500 ml to 1000 ml / hr .
- * Feed Rate :1.0 to 1.5 ltr/hr or 1.5 kf /Hr.
- * Output Product Rate @ 30 - 40 % solid : 400g - 500g/hr. kg/hr.
- * Suitable For : Aqueous / Water Based Solvent Feed Solution.
- * Heating Power : 4.5 KW, Single Phase.
- * Max inlet temperature : 260degree C : accuracy \pm 5 degree C.
- * Hot air flow Co - current.
- * Nozzle Type : Two Fluid nozzle.
- * Nozzle Diameter : 1.0 mm / 0.7 mm.
- * Typical yield : 40 - 70 %.
- * Operating Conditions : Open.
- * Power Consumption : Max 19 amps.
- * Voltage : 200 - 230 V : 50/60 Hz.
- * Dimension (H X W X D) : 1250 X 500 X 600 (mm).
- * Weight : 95 kg.
- * Blower Type : 0.5 HP Aspirator.

3 Kg & 5 Kg / WE / Hr.

Technical Specifications >

- * Evaporation capacity : 3-5 ltr/hr.
- * Feed Rate : 6.2 ltr/hr.
- * Output Product Rate @ 30 - 40 % solid : 2.10 kg/hr.
- * Max inlet temperature : 260 degree C : accuracy \pm 1 degree C.
- * Atomization : Two Fluid Nozzle, Pressure Nozzle and Rotary Atomizer
- * Application : Food , Pharmaceutical , Enzymes, Chemical, Clays, Dyestuff, Leather, Pigment, Polymer ?& Textile.

30 KL Limpeted Reactor

Range Of Products

* Reactors

Sizes Range From : 0.5 KL To 40 KL
MOC : SS 304 / SS 316 GMP and Non GMP.

* Heat Exchangers

Capacity From 1 Sq Mtr To 150 Sq Mtr.
Shell and Tube Type / Floating Head Type /
Expanded & Double Tube Sheet Type.

* Storage Tanks

* Self Stiffened Storage Tank

Capacity Upto 95 KL
Available with SS Limped,
Insulation and SS Cladding ,
Polished upto 400 Grit Mirror for Food Grade.

* Twin Shaft Disperser

* High Speed Mixers

Range from 0.5 KL TO 20 KL
Operate at 1440 RPM.

* Continuous Nitration Systems

Nitration Systems.
Operates continuously for 24 X 7.

10 KL
Twin Shaft Dispersor

25 KL
SS 904L Reactor

62 Limpeted
Storage Tank

Extractor

Salient Features :

- * Construction to Suit cGMP norms.
- * Totally Enclosed untouched process.
- * Manufactured out of laboratory tested & certified quality stainless Steel.
- * Modular construction to ease of installation & Operation
- * Heating options are available as steam , thermic oil , hot water etc.
- * Vacuum transfer system is available.
- * PLC Operated fully automatic system available.
- * Bottom discharge.
- * Positive locking system at bottom discharge.
- * WIP washing in place pressurized rotation water jet spray ball.
- * Digital process timer.
- * Digital temperature controller.
- * The Machine is user friendly & easy to operate.
- * Occupying minimum space.
- * Filter screen at bottom discharge backup with perforated plate.
- * The manhole is convenient for cleaning the interior while changeover of the product.
- * Provided with level switch.

A hydraulic power pack is a system comprising an interconnected set of discrete components that transport liquid. The purpose of this Hydraulic Power pack system may be to control where fluid flows (as in a network of tubes of coolant in a thermodynamic system) or to control fluid pressure (as in hydraulic amplifiers).

For example, hydraulic machinery uses hydraulic circuits (in which hydraulic fluid is pushed, under pressure, through hydraulic pumps, pipes, tubes, hoses, hydraulic motors, hydraulic cylinder, and so on) to move heavy loads. The approach of describing a fluid system in terms of discrete components is inspired by the success of electrical circuit theory.

Hydraulic Power Pack

Hydraulic cylinder get their power from pressurized hydraulic fluid, which is typically oil. The hydraulic cylinder consists of a cylinder barrel, in which a piston connected to a piston rod moves back and forth. The barrel is closed on one end by the cylinder bottom (also called the cap) and the other end by the cylinder head (also called the gland) where the piston rod comes out of the cylinder.

The piston has sliding rings and seals. The piston divides the inside of the Hydraulic cylinder into two chambers, the bottom chamber (cap end) and the piston rod side chamber (rod end / head end). Flanges, trunnions, clevises, and lugs are common cylinder mounting options. The piston rod also has mounting attachments to connect the cylinder to the object or machine component that it is pushing or pulling.

Hydraulic Cylinder

Pick and Place

Scissor & Forceps Stand

Application

In Present modern world human life is been affected with plenty of health-related issues Pharma Industries have been manufacturing wide ranges of medicines for the curing the same. In such process proper Cleaning & sterilization of the wide range of the Change parts is most important to avoid the cross over contamination & ensure Product safety. For Such a crucial & critical application S Clean dose provides a hand to resolve the above issues. With Help of the S Clean brand Ultrasonic cleaning system user dose get assured for the proper cleaning process without any human interference as the system is completely Automated & Safety of the user & product to be cleaned is top most priority taken care in the process.

Above System is been used for cleaning the Change Parts used in Pharmaceutical Industries. It can be used to clean the contamination like the Oil, Wax & Other product contamination remained on the components during the changeover.

Process

- 1) Precleaning With Jet Spray 2) Tank Washing Spray Process 3) Soap Dispensing 4) Air Agitation Process
- 5) Tank Washing Spray Process 6) Ultrasonic Cleaning Process 7) Tank Washing Spray Process
- 8) Final Rinse with Air Agitation 9) Tank Washing Spray Process

Dehumidification Systems

Solid desiccant dehumidification

We have successfully launched in 2015 our range of Solid desiccant based dehumidification systems both in Standard Standalone Dehumidification Series in Our Product basket as well as Customised Engineered version of Solid desiccant dehumidification systems widely known as AHU Cum Dehumidifiers and Engineered Dehumidifiers comprising of precooling coils, Post cooling coils and Various stages of filtration as desired by Process requirements. Both Standard and Customised series are available with Electrical reactivation and Steam based reactivation modes suitable to the utilities available at site.

Spherical Vacuum Concentrator

Salient Features :

- > cgm construction.
- > Totally enclosed untouched process.
- > Manufactured out of laboratory tested & certified quality stainless steel.
- > Heating options are available as steam, thermic oil ,hot water etc.
- > PLC operated fully automatic system available.
- > WIP washing in place pressurized rotating water jet spray ball.
- > Digital process timer.
- > Digital temperature Controller.
- > The machine is user friendly & easy to operate.
- > Occupying minimum space.
- > Scraper stirrer can be added (optional) which can effectively increase the ratio of concentration & greatly increase the evaporation capacity.
- > The manhole is convenient for cleaning the interior while changeover of the product.
- > Provided with oil separator.

Spherical concentrators are suitable for Ayurvedic, Pharmaceutical, Dairy , Chemicals , Biological & other industries on the liquid concentration & recovery of organic solvents & other process.

1 & 2, Vaze Compound, Davdi Junction, Davdi Rd, MIDC Phase – I, Dombivali (E) Mumbai,
Dist. Thane. 421 203 (MS), India,

Air Handling System

Double Skin Ventilation Unit

Air Handling Units have a all range of applications in coolings, heatings, humidifications and ventilations etc.

AMICRON CLEANTECH PVT LTD are selected and unique design by us for choosing ideal and latest quality design for our double skin Air Handling Unit (AHU)to provides supreme outputs.

GMP Clean Room Doors & Cold Room Panels

Clean room environments are required at a place where there is high risk of air contamination through environmental pollutant like dust, airborne microbe, aerosol particle and chemical vapour.

Designed for excellence, Amicron Make Health clean room door provides optimum solutions for the requirement in pharmaceutical, hospital, health, commercial and retail environments where there is a requirement for clean air.
